From	Corporate Communications

A section of the press carried reports yesterday & today putting out information on BDO India not meeting its tax obligations, discovered on the back of a GST investigation that took place in our Mumbai & Pune offices.

We confirm the visit of the GST team; the findings of the investigation however, does not report a single incidence of tax 'evasion'.

The proceedings of the investigation were thorough and concluded with the submission of our payment schedule for balance tax payable, in concurrence with the officials.

We would like to emphasise our position as being tax compliant at all times with responsible acknowledgement of our duties towards the government and all our clients.
