

A conceptual image for a sustainability report. A hand is shown from the bottom, holding a clear glass globe. Inside the globe, a small green tree with many leaves is growing. A white butterfly with black markings on its wings is perched on the side of the globe. The background is a soft, out-of-focus green and white, suggesting a natural environment. A diagonal white line cuts across the image from the top left to the bottom right. The bottom right corner features a red triangle containing the BDO logo.

SUSTAINABILITY & ESG

CREATING SUSTAINABLE SOLUTIONS TOGETHER

BDO in India
2024

With economic growth being restored globally, the next challenge is decoupling this growth from sustainable development parameters in a resource-constrained world overwhelmed with challenges of climate change, lack of sustainable infrastructure, inappropriate development priorities, and irresponsible production and consumption patterns.

Managing sustainability risks and maximising opportunities would require unprecedented analysis, innovation, commitment, and actions. This necessitates a fundamental re-examination of the economy’s relationship with material resources, energy, water, waste, and biodiversity, in terms of both consumption and renewal.

Making sustainability a reality across sectors requires dedicated efforts and conscious collaboration from professionals committed to developing innovative and lasting solutions. Building a sustainable business is about making a tangible difference – cultivating smarter business for a stronger world. If you are looking to drive value and fuel growth while strengthening our environment and society, our teams of experienced sustainability experts can guide you in making strategic moves to manage your environmental, climate and social impacts; and addressing regulations, compliances and metrics across ESG (environmental, social and governance) opportunities.

An effective approach to sustainability needs to look at all the components that can affect us by going beyond the ‘feel good’

WHY BDO IN INDIA

With a deep passion for creating sustainable solutions supplemented with domain expertise and experience in the space, our team of Sustainability & ESG (Environment Social Governance) experts are well poised to help you define your sustainability priorities, chart your business agenda and provide the necessary support and guidance to transform your organisation into a sustainable business.

Our Solutions are designed to support clients across maturity levels:

Our solutions are developed based on a mature understanding of the diverse needs of clients from both private and public sectors. The solutions aim at enabling organisations to integrate sustainability across business functions - addressing risks and leveraging opportunities. We also support governments for appropriate assessments and decision-making and assist multi- and bi-lateral institutions in programme design and implementation.
